UW-Madison Astrophysics Internship Opportunity
Applications due September 22, 2014

UW-Madison physics research center looking for high school interns

One of the coolest telescopes in the world—literally, it’s at the South Pole in Antarctica—is run by UW-Madison physicists. The Wisconsin IceCube Particle Astrophysics Center, WIPAC, is looking for high school student interns for hands-on astrophysics research.

As a WIPAC intern, you will:
• Participate in a real world physics experiment,
• learn how to write computer programs,
• get to know working astrophysicists, and
• contribute to data processing.

When: October 2 to December 11, Thursdays from 4:30-6:30 pm.

Where: At the WIPAC offices, 222 W. Washington Ave. Madison, WI

APPLY at wipac.wisc.edu/news/view/254

For more information, email hs-intern@wipac.wisc.edu. Background in physics or programming not required.
