

ICECUBE MASTERCLASS

AN AUTHENTIC ASTROPHYSICS RESEARCH EXPERIENCE

icecube.wisc.edu/masterclass

Wed, March 7, 2018 9am - 5pm

Join UW–Madison scientists in a collaborative analysis of IceCube data and learn from young researchers why a science career is an interesting, even fun, and most of all real option for you.

Learn about IceCube, a cubic-kilometer detector at the South Pole, and about how tiny, ghostly particles, called neutrinos, can help us explore the extreme Universe.

Audience: High school students and teachers, sophomores and above.
Registration is free, but spots are limited.
